Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 to 9, drawn to an isolated polypeptide, an isolated polypucleotide encoding that polypeptide, a vector and host cell containing that polypucleotide, and a method of making the claimed polypeptide by employing the claimed host cell.

Group II, claim 10, drawn to an antibody.

Group III, claim 11, drawn to a binding assay.

The inventions listed as Groups I to III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The antibody of group II is chemically and structurally distinct from the polypeptide of invention I and these two different compounds lack unity of invention because they do not share a common utility that is based upon a common structural feature or combination of features lacking from the prior art. The isolated polypeptide of Group I and the assay of Group III lack unity of invention because Group III is not limited to a process that uses the isolated polypeptide of Group I.
